Applying Your Pet's Topical Gel

Your pet's medication has been made into a topical gel to make administering the medication easier for you and less stressful for your pet

Step #1: Slip finger cot over finger that you intend to apply medication with.

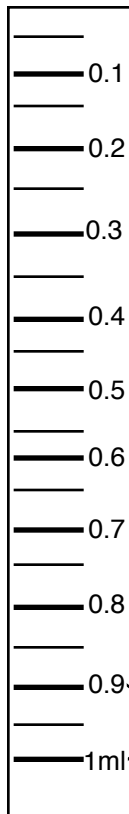

*Finger cots have been provided with the prescription and should be worn to prevent the medication from being absorbed through your fingertip

Step #2: Remove cap from syringe, push on white plunger to dispense the dose onto your fingertip.

*The gel is dispensed in pre-filled topical syringes to ensure accurate dosing.

Step #3: Apply medication and rub into hairless section of your pet's ear until medication is fully absorbed.

- Store medication at room temperature.
- Do not expose to cold temperature.
- Please contact our staff if you have any further questions

Each 1ml syringe holds 10 doses
