Administering Oral Medications

Your medication has been formulated into a liquid and provided with a blue cap to use with an oral dosing syringe for easily measuring the prescribed dose

Step #1: Remove child safety lid from bottle and screw on blue cap

***Blue cap may be then left on product for storage**

Step #2: Shake bottle well to ensure medication is evenly distributed.

Step #3: Insert syringe into blue cap. Make sure syringe is pushed all the way into the opening, then turn bottle upside down.

Step #4: Pull back and forth on syringe until all the air bubbles are gone, and then pull back until you reach the correct measured dose.

Please contact our staff if you have any further questions
