

SAND RUN PHARMACY

October 2017

Getting an annual flu vaccine is the first and best way to protect you and your family from the flu!

The Flu Shot Can Reduce:

Flu illnesses
Doctors' visits
Missed work/school due to flu
Flu-related hospitalizations.

Who Should Get A Flu Shot?

We can give the flu shot to anyone 7 years of age and older!

Which Flu Shot should I get?

At Sand Run Pharmacy, we offer 4 options

- 1) **Fluzone:** A high dose flu shot which is made specially for anyone 65 years of age or older
- 2) **Flulaval:** Can be given to any person 7 years or older here at Sand Run Pharmacy
- 3) **Flucelvax:** A preservative free option that can be used for any one with an egg allergy
- 4) **Fluvirin:** Can be given to any person 7 years or older here at Sand Run Pharmacy

Special Considerations

People with a severe egg allergy or who have had a severe reaction to the flu shot in the past

When Should You Get A Flu Shot?

By the end of October.

It takes about two weeks after vaccination to go into full effect, therefore it is best that people get vaccinated before flu season starts.

Happy Halloween from Sand Run Pharmacy

Issue 2

What would Ohio Issue 2 do?

It would require the State of Ohio, including agencies such as Ohio Medicaid, to not pay more for prescription drugs than the VA.

How Will This Impact Me?

Issue 2 would impact prices for people on Medicaid, in developmental disability centers, and in state veterans' homes.

It could also affect prescription coverage provided to state workers and retirees through their pension funds.

Strong Opposition

Issue 2 is opposed by over 40 organizations including:

Several Veteran and Pharmacist Associations, and the Ohio State Medical Association.

Pneumonia Vaccination

CDC recommends two pneumonia vaccinations (Pneumovax23 and Prevnar13) for all adults 65 years or older:
